V. Reasoned statement under Article 35(2) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement

1. Statement

Novelty (N)	Claims	1-18	YES
	Claims		NO
Inventive step (IS)	Claims	1-18	YES
	Claims		NO
Industrial applicability (IA)	Claims	1-18	YES
	Claims		NO

2. Citations and explanations

Claims 1-18

The inventions set forth in claims 1-18 are not disclosed in any of the documents cited in the international search report or other documents considered relevant to the invention in question, and are not obvious to a person skilled in the art.

The inventions set forth in claims 1-18 are, therefore, novel and involve an inventive step.

VIII. Certain observations on the international application

The following observations on the clarity of the claims, description, and drawings or on the question whether the claims are fully supported by the description, are made:

The scope of the international preliminary examination report on claims 1-18.

The only "dyes having an absorption spectrum in aqueous solution with λ_{\max} 500 nm to 700 nm and having an absorption spectrum with a half value width of 100 nm or greater in a dilute solution normalized to absorbance 1.0" specifically supported by the description are the black dyes BL-1 and BL-2; other such dyes are not specifically disclosed and also lack any support.

Therefore, black inks for inkjet recording using dyes other than BL-1 and BL-2, specifically disclosed, cannot be considered to be fully supported by the description and no meaningful opinion can be expressed thereon.

The international preliminary examination report, therefore, refers only to black inks for inkjet recording using a "dye having an absorption spectrum in aqueous solution with λ_{\max} 500 nm to 700 nm and having an absorption spectrum with a half value width of 100 nm or greater in a dilute solution normalized to absorbance 1.0" wherein the dye has the basic structure below.
